

New Product Announcement

Amplical

RF for RF Engineers

Amplical Corp. announces the immediate availability of a new family of broadband attenuators ideal for broadband wireless applications. The model 50MAP2G6-63SS covers the frequency range 2 GHz to 6 GHz. Attenuation step size is 1.0 dB and maximum attenuation is 63 dB. Step sizes are 1,2,4,8,16, and 32 dB and control is via TTL. Accuracy is +/- 0.3 or 3% of the attenuation setting. Insertion loss is 7 dB maximum.

The 50MAP2G6G-63SS is supplied with sma(f) input and output connectors and draws less than 50 mA in DC current from a -12V supply. The unit has a small profile at less than 2 inches square including connectors and less than 1 inch in height.

Utilizing small internal part count the unit is economically priced and delivery is typically from stock. Other voltages, attenuations step sizes and frequencies are also available. Contact Amplical today to learn more about how this new product may fit your design needs.

About Amplical

www.amplical.com

Amplical is determined to be a leading supplier of quality RF microwave components. Utilizing the latest in RF Microwave technology, Amplical focuses on premium quality amplifiers and attenuators at affordable prices.
