

New Product Announcement

Amplical

RF for RF Engineers

Amplical Corp has announced the availability of a new family of broadband linear high power amplifiers designed with MMIC technology, resulting in an economical and reliable solution. The model AMP2G6-30-33 is a 2 GHz to 6 GHz amplifier that features at least 30dB gain. The amplifier outputs a minimum of 2 Watts of power. Current draw is typically 2.5A from +12V. Connectors are sma (f) and delivery is typically stock to several weeks. Other models are available that feature additional gain, different input voltages and frequency ranges.

About Amplical

www.amplical.com

Amplical is a leading supplier of quality RF microwave components. Utilizing the latest in RF Microwave technology, Amplical focuses on premium quality amplifiers and attenuators at affordable prices.
