

New Product Announcement

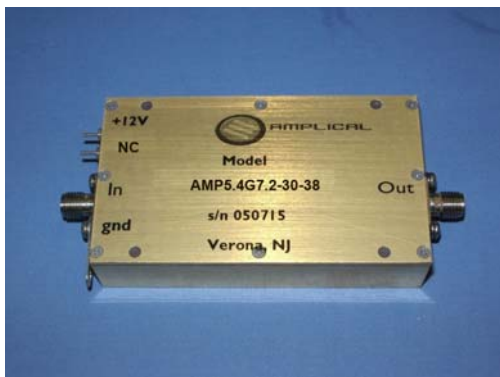

Amplical

RF for RF Engineers

Amplical Corp. announces the immediate availability of a new C-band high power amplifiers ideal for wireless, defense and satellite communications. The model AMP5.4G7.2-30-38 covers the frequency range 5.4 GHz to 7.2 GHz. The output power at 1dB compression is at least 38 dBm and gain is greater than 30 dB. Input voltage is +12V and current draw is less than 5A. Additionally the unit is equipped with an integral isolator at the output.

The AMP5.4G7.2-30-38 is supplied with sma(f) input and output connectors and has a small profile at less than 3 inches by 5 inches including connectors and is less than 1 inch in height.

Utilizing small internal part count the unit is economically priced and delivery is typically from stock. Other supply voltages, power levels and frequencies are also available. Contact us today to learn more about how this new product may fit your design needs.

About Amplical

www.amplical.com

Amplical is determined to be a leading supplier of quality RF microwave components. Utilizing the latest in RF Microwave technology, Amplical focuses on premium quality amplifiers and attenuators at affordable prices.
