

Description:

Amplical's SW1R002 SPST broadband coaxial reflective PIN diode switch features low insertion loss, low vswr, high isolation and fast switching speed. RF ports incorporate DC blocks. An on-board TTL-compatible driver provides convenient logic control. The switch operates from +5V DC and a negative DC supply ranging from -12V to -20V. The compact design incorporates SMA female connectors. Two ø0.096 through holes are provided for convenient chassis mounting.
